REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the light emitting device as recited in the claims, including the SiN/AlInGaN superlattice buffer layer. The specification notes the advantage of reduced dislocation density associated with the buffer layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The references on the form PTO 892 all teach multilayers including SiN.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist, whose telephone number is (571) 272-1562.
